

Every year, Loma Linda University Health makes a significant contribution to the people and local economy of the Inland Empire’s San Bernardino and Riverside Counties as we fulfill our mission “to make man whole.” LLUH is a Level-1 Trauma Center and quaternary, specialty care provider for children, adults, and older adults as we care for families across their lifespan to ensure we improve the health of our community, regardless of their resources or ability to pay.

### Community Benefit Report FY 2018: July 2017 - June 2018

Subsidized Health Services

**\$3.56** Million  
Community Health Services

**\$46.26** Million  
Education & Research

This report is prepared based on audited financial statements and Hospital’s 990-Schedule H

LLUH provides a safety-net for our community. Programs that support our ability to care for the region’s most vulnerable populations are vital. In FY 2018, LLUH saved \$26.5 million due to participation in the 340b pharmaceutical discount program. These savings support our hospital’s operations so that LLUH can steward the scarce federal dollars to provide care to the region’s most vulnerable populations.

Number of People Served*	
Inpatient Visits	50,115
Outpatient Visits	1,662,449
OB-Delivered Discharges	3,551
Emergency Department Visits	132,552
