- Local community-based service programs
- Mentorship with experienced global health clinicians

Loma Linda Global Service Concentration

Mission

To prepare Loma Linda Resident Doctors for global service.

The Loma Linda University Residency Medicine Programs uphold the mission of Loma Linda University, "To continue the healing ministry of Jesus Christ" and "Make Man Whole". Embracing service to the advantaged and disadvantaged here and abroad, our purpose is the formation of servant leaders committed to reducing global suffering and health disparities.

Goals

A program in which multiple departments cooperate, the Global Service Pathway provides customized postgraduate experiences that prepare physicians for global practice and service. The Global Service Concentration allows residents to provide health care in international and local service settings, while achieving basic competencies in Global Health.

Preliminary Schedule
